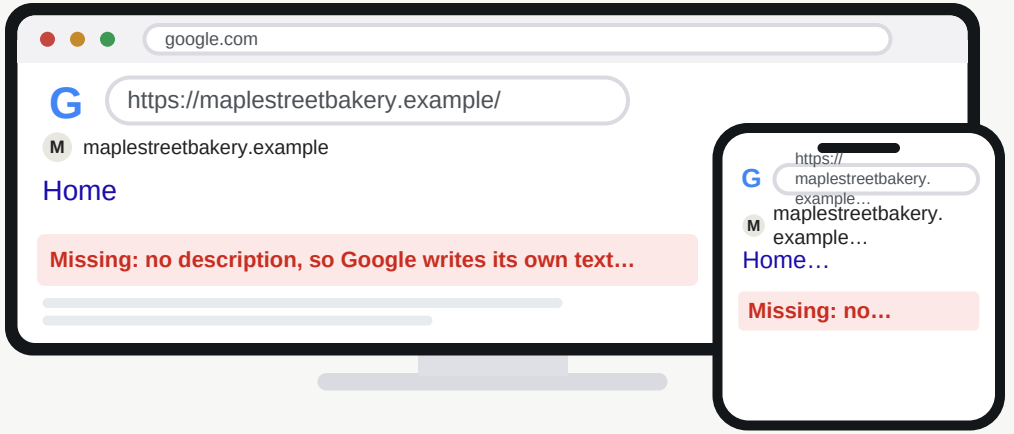
Images	8

How maplestreetbakery.example looks in search

! Your title and your description both need work.



What is holding your site back

- **No description under your Google listing**

  Google writes its own description, and it is rarely the one you would choose.

- **Your page has no clear main headline**

  Visitors and Google cannot tell at a glance what the page is about.

- **Your site is not set up for phones**

  Phone visitors get a shrunken desktop page.

- **Some links on your site are broken**

  Visitors hit dead ends, and Google trusts the site less.

What is already working

- Google is allowed to visit your site
- Google can load your styles and scripts
- Your page can appear in Google
- Google can follow your links
- The HTML is a sensible size
- The content is in the HTML

What happens if nothing changes

On-Page SEO	Search engines keep guessing what your pages are about.
Performance	Slow pages keep losing visitors before they see anything.
Images	Heavy or unlabelled images keep slowing pages and hiding you from image search.

What we would fix first

1. **No description under your Google listing**

   +1 on your score

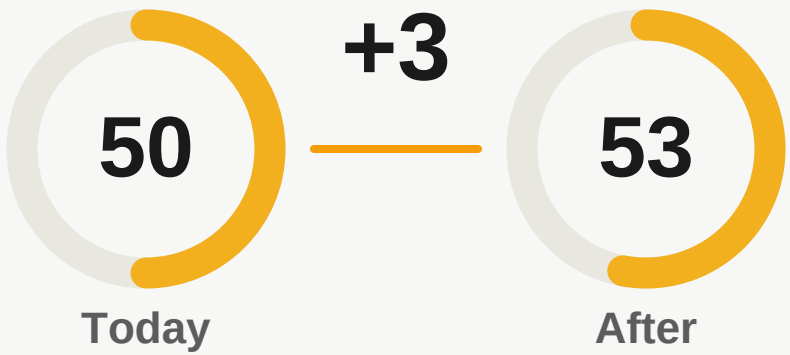
2. **Your page has no clear main headline**

   +1 on your score

3. **Your site is not set up for phones**

   +1 on your score

What fixing it would change



- **You choose what shows under your name in Google.**
- **Visitors and Google see at once what the page is about.**
- **Phone visitors get a page made for their screen.**

Points are the audit's own scoring, not a promise of rank.

There is more to see

+30 more findings in the full report

- **Some links on your site are broken** 
- **Your main content shows up late** 
- **4 images heavier than they should be** 

Three ways we can help

A new site built to pass these checks

Built to pass the 33 checks that failed here, starting with “No description under your Google listing”.

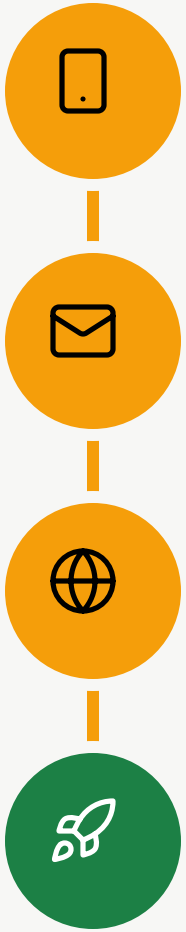
Lift your Images score

Scored 8 out of 100. Heavy or unlabelled images slow pages and hide you from image search.

A monthly health report

We run these 80 checks again each month and tell you what changed.

How it works, step by step



A short call

We go through this review together and agree what matters most.

A clear proposal

What we would do, in plain words, with the price.

We build it

You see it take shape and tell us what to change before launch.

Launch and look after it

We switch it on, then check it every month.

Let's fix this together.

This audit reads one page the way a search engine does. It is a set of checks, not a promise about how the page will rank.
