PREPARED FOR

maplestreetbakery.example

A short review of what your website does well and where it can do better.

4 November 2026

Where your website stands today

Needs work

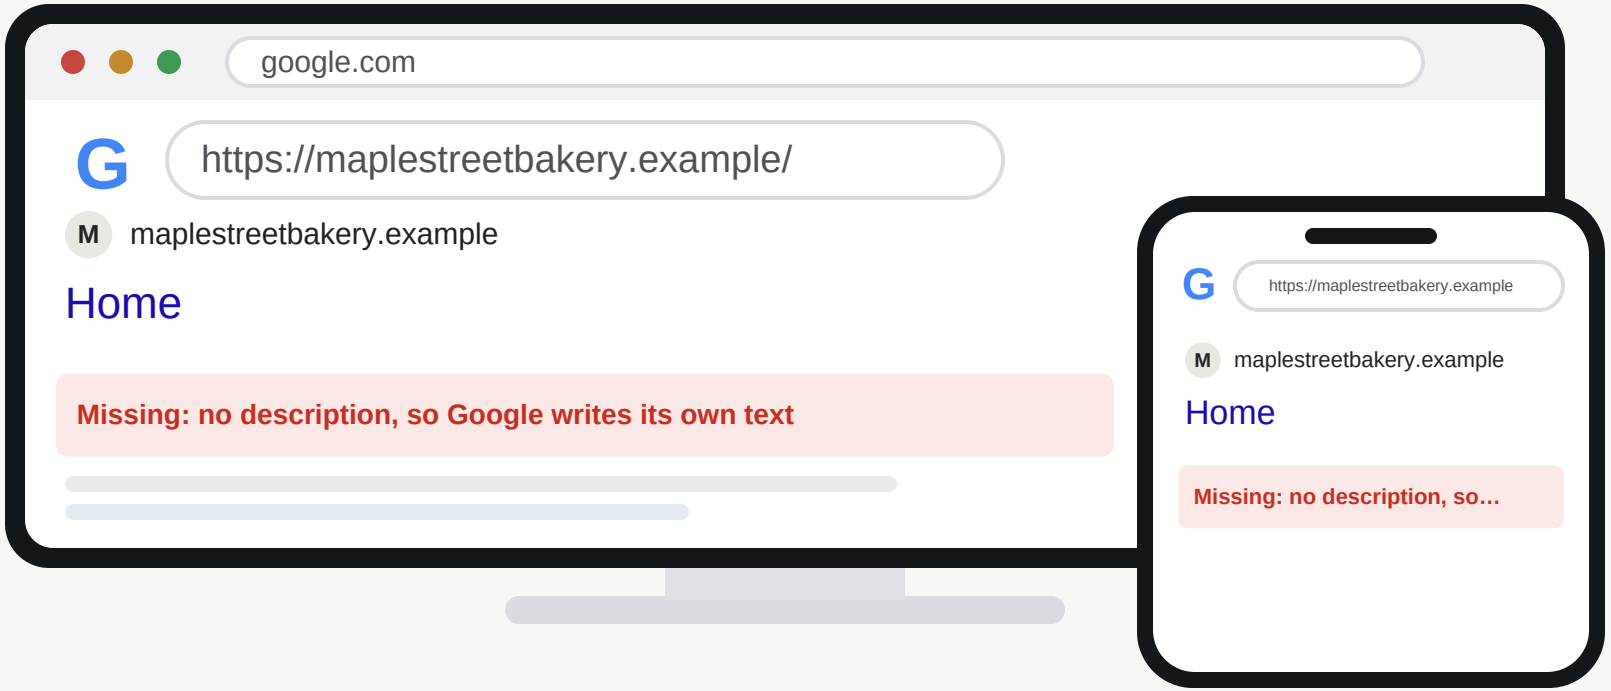
Your site is holding back its own results.

The fixes in this review could lift it to about 53.

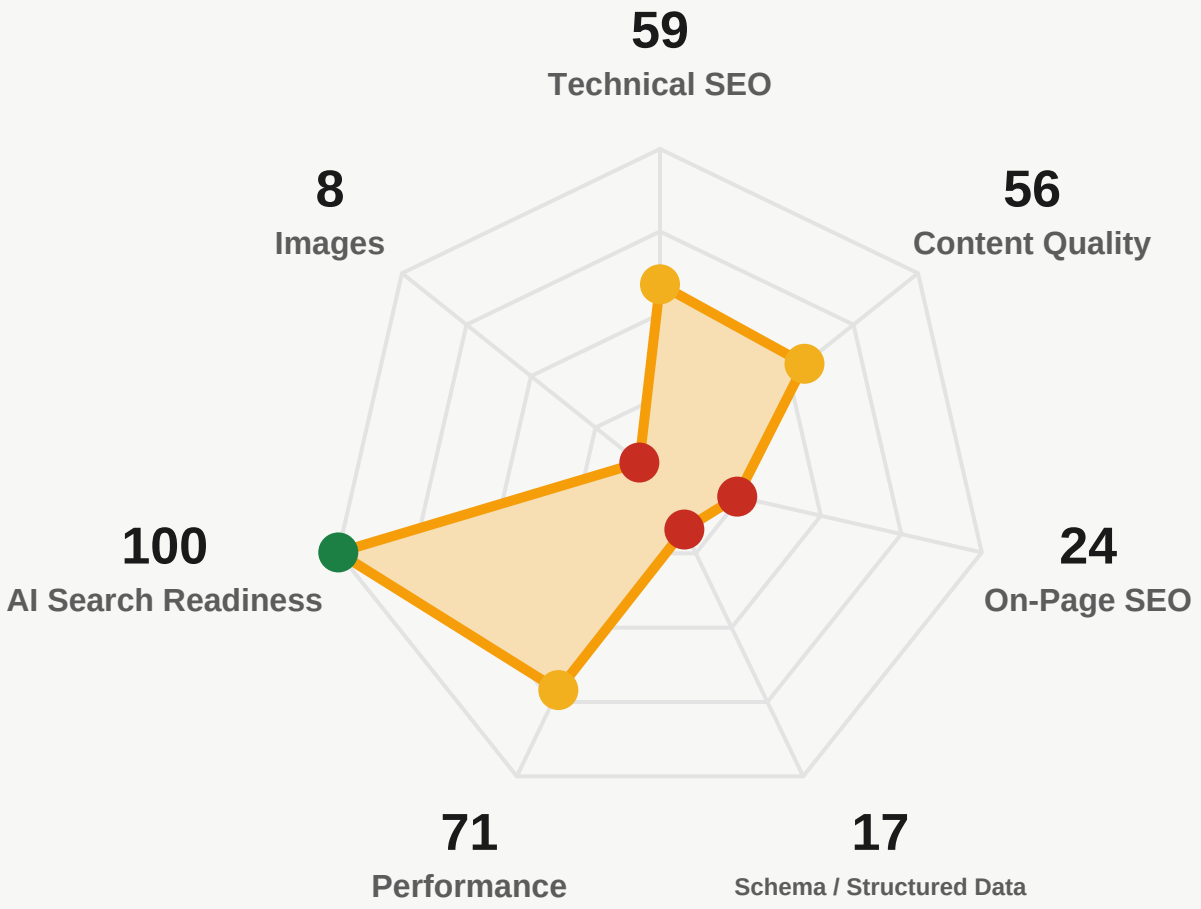
- **6** serious
- **11** medium
- **16** minor

How maplestreetbakery.example looks in search

Your title and your description both need work.



How each part of your site scores



WEAKEST

Images

8 out of 100

STRONGEST

AI Search Readiness

100 out of 100

33

things holding your site back

- **No description under your Google listing**

  Google writes its own description, and it is rarely the one you would choose.

- **Your page has no clear main headline**

  Visitors and Google cannot tell at a glance what the page is about.

- **Your site is not set up for phones**

  Phone visitors get a shrunken desktop page.

- **Some links on your site are broken**

  Visitors hit dead ends, and Google trusts the site less.

47

things already working

47 of 80 checks passed

- Google is allowed to visit your site
- Google can load your styles and scripts
- Your page can appear in Google
- Google can follow your links
- The HTML is a sensible size

What happens if nothing changes

On-Page SEO	Search engines keep guessing what your pages are about.
Performance	Slow pages keep losing visitors before they see anything.
Images	Heavy or unlabelled images keep slowing pages and hiding you from image search.

What we would fix first

1

+1 on your score

No description under your Google listing

You choose what shows under your name in Google.

2

+1 on your score

Your page has no clear main headline

Visitors and Google see at once what the page is about.

3

+1 on your score

Your site is not set up for phones

Phone visitors get a page made for their screen.

What fixing it would change

3 problems on the plan

Fix all 33 and it can reach 90 or more.

- **You choose what shows under your name in Google.**
- **Visitors and Google see at once what the page is about.**
- **Phone visitors get a page made for their screen.**

Points come from the audit's own scoring. A score is a set of checks, not a promise about how a page will rank.

+30

more findings are waiting in the full report

- **Some links on your site are broken**
  Exact fix and page, in the full report
- **Your main content shows up late**
  Exact fix and page, in the full report
- **4 images heavier than they should be**
  Exact fix and page, in the full report
- **Thin content (62 words)**
  Exact fix and page, in the full report
- **No link to a privacy page**
  Exact fix and page, in the full report

Three ways we can help

01

A new site built to pass these checks

Built to pass the 33 checks that failed here, starting with “No description under your Google listing”.

02

Lift your Images score

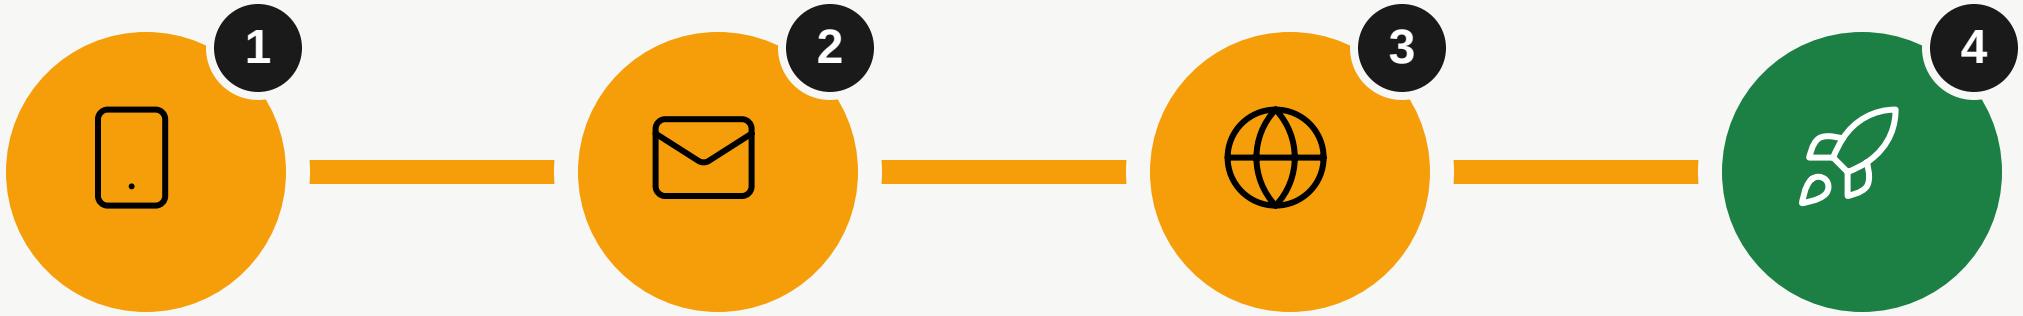
Scored 8 out of 100. Heavy or unlabelled images slow pages and hide you from image search.

03

A monthly health report

We run these 80 checks again each month and tell you what changed.

How it works, step by step



A short call

We go through this review together and agree what matters most.

A clear proposal

What we would do, in plain words, with the price.

We build it

You see it take shape and tell us what to change before launch.

Launch and look after it

We switch it on, then check it every month.

Let's fix this together.

This audit reads one page the way a search engine does. It is a set of checks, not a promise about how the page will rank.
